2. Introduction

The SIFULAN™ Malaysian Access Federation (Federation) is introduced to facilitate and simplify the introduction of shared services across the Federation. This is accomplished by using federation technologies to extend the scope of a digital identity issued by one Federation Member to be valid across the whole Federation. The Federation relies on Home Organizations and Attribute Authorities to correctly and accurately assert information about the identity of End Users to Service Providers, that MAY use that information to grant (or deny) access to the services and resources they offer to End Users.

2.1 The purpose of SIFULAN™ from here on referred to as the Federation is to provide a mechanism for connecting members of the education and research sectors (including academics, researchers, students and government servants) from here on referred to as ("End Users") securely and reliably to online information, infrastructure, services and resources.

2.2 Subscription to the Federation is available to organisations and institutions from here on referred to as ("Federation Member") which undertake or support education, research or research and development in Malaysia and agree to be bound by the Federation Policy ("Policy") and these Rules ("Rules").

2.3 The Federation relies on Federation Members, as Identity Providers, correctly and accurately asserting information about the identity of its End Users to other Federation Members who, as Service Providers, will use that information to grant (or deny) access to the services and resources they offer to End Users.

2.4 The scope of the Federation MAY be extended over time to include a broader range of Federation Member beyond the education and research sectors.

2.5 The electronic exchange of authentication information between End Users, Identity Providers and Service Providers and the provision of support services for Federation Members MAY be managed by an Operator on behalf of the Federation.

The Federation Policy document defines the Federation by defining the Federation Members' obligations and rights to be able to use available Federation Technologies for electronic identification and for access to attribute and authorization information about End Users in the Federation.

This document, together with its appendices constitutes the Federation Policy. The current list of all appendices is available on the website of the Federation.
